PROFESSIONAL SUMMARY

Final-year B.Tech Computer Science (Data Science) student with a strong foundation in Data Structures, Algorithms, and Object-Oriented Programming, combined with hands-on experience building and deploying live web applications. Has independently designed, built, and shipped multiple end-to-end projects — including a client e-commerce website, a resume-parsing tool, and an interactive web game — using HTML, CSS, JavaScript, and modern deployment platforms. Comfortable working across the full development cycle from logic design to UI polish and production deployment, with a disciplined, self-driven approach to learning.

TECHNICAL SKILLS

Languages	C++, Python, JavaScript, HTML5, CSS3
Core CS Fundamentals	Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), DBMS, Operating Systems
Web & Tools	Responsive Design (Flexbox, Media Queries), Web Audio API, Git, GitHub, VS Code, Netlify, GitHub Pages
Database	MySQL
Problem Solving	LeetCode & HackerRank — regular practice with focus on time & space complexity optimization

PROJECTS

DKG Mobiles — E-Commerce Showcase Website

HTML, CSS, JavaScript · Netlify

- Built and deployed a complete e-commerce showcase site for a mobile retail store as Associate Developer, handling product listings, brand panels, and a contact section with embedded map — all self-contained in a single, maintainable codebase.
- Implemented a dynamic countdown-timer offers section to drive urgency, and resolved third-party image hotlinking failures (CDN 403 errors) by migrating to reliable open-source image sources.

Resume Analyzer

HTML, CSS, JavaScript · GitHub Pages

- Developed a web application with genuine PDF/DOCX parsing to analyze resume structure, detect key sections, flag weak phrasing, and perform keyword matching against job requirements.
- Designed a clean, responsive UI and deployed the live tool publicly via GitHub Pages.

RPS://PROTOCOL — Interactive Rock-Paper-Scissors Game

HTML, CSS, JavaScript

- Built a polished, single-file browser game featuring an adaptive AI opponent that learns from player patterns, live data visualizations of match stats, and immersive sound effects via the Web Audio API.

Personal Portfolio Website

HTML, CSS, Responsive Design

- Designed and coded a personal portfolio to showcase projects, skills, and milestones, using Flexbox and media queries for a fluid experience across desktop and mobile.

EDUCATION

B.Tech, Computer Science & Engineering (Data Science)

Maharana Pratap Engineering College, Kanpur

2027 (Expected)

CGPA: 7.2

Intermediate (ISC)

ISC Board

2023

High School (ICSE)

ICSE Board

2021

KEY STRENGTHS

- Data Structures & Algorithms:** Regular problem solver on LeetCode and HackerRank, with focus on structured patterns and optimized solutions.
- Full-Cycle Web Development:** Proven ability to independently design, build, and deploy production-ready websites for real clients, end to end.
- Object-Oriented Programming:** Practical command of C++ OOP concepts (Inheritance, Encapsulation) for writing modular, reusable code.
- Analytical Mindset:** Skilled at breaking down problem statements into efficient, structured programming approaches.
